
Software Programmer (Web Applications)

We're looking for a skilled and self-motivated **Software Programmer** with a strong focus on **web application development** to join our team. In this role, you'll be responsible for creating innovative web-based software solutions from conception to deployment.

If you're passionate about building robust and user-friendly web applications, thrive in an environment with minimal supervision, and consistently meet deadlines, we encourage you to apply!

Key Responsibilities

- Design, develop, and maintain high-quality web applications using your expertise in any programming language (ex. PHP, Node.js)
- Write clean, efficient, and well-documented code primarily in **JavaScript** and leverage libraries like **jQuery** as needed.
- Collaborate with stakeholders to understand requirements and translate them into technical specifications and functional solutions.
- Troubleshoot, debug, and optimize existing web applications to ensure optimal performance and user experience.
- Implement and maintain APIs and integrate with various third-party services.
- Stay up-to-date with the latest web technologies and industry best practices.
- Actively participate in code reviews and contribute to team knowledge sharing.

Required Skills & Experience

- Proven experience in **web application development**.
- Strong proficiency in either:
 - **PHP** with extensive experience in the **Laravel framework**.
 - **Node.js** and **React.js**.
- Expertise in **JavaScript** and experience with **jQuery**.
- Solid understanding of front-end technologies (HTML5, CSS3).
- Experience with relational databases (e.g., MySQL, PostgreSQL).
- Familiarity with version control systems, preferably Git.
- Ability to work independently with **minimal supervision** and take ownership of projects.
- Excellent **time management** skills and a proven ability to **meet deadlines**.

-
- Strong problem-solving abilities and attention to detail.
 - Good communication skills, both written and verbal.

Bonus Points (Nice-to-Have)

- Experience with cloud platforms (AWS, Azure, GCP).
- Familiarity with containerization technologies (Docker).
- Knowledge of testing frameworks and methodologies.
- Experience with Agile/Scrum development methodologies.
